About

I am a MET student with one year of manufacturing internship experience supporting equipment design, process improvements, and safety initiatives in a production environment. I enjoy taking ownership of technical projects, working directly with operators, and developing practical solutions that make a measurable impact.

Skills

- SolidWorks
- Autodesk Inventor
- AutoCAD
- Tooling Design
- Prototype Development
- Finite Element Analysis (FEA)
- P&ID Interpretation
- Process Improvement
- Lean Manufacturing
- Six Sigma Fundamentals
- Time Studies
- Data Collection & Analysis
- Safety Risk Assessment
- Technical Documentation
- Cross-Functional Collaboration
- Operator Engagement
- Mechatronics

Education

Dobyns Bennett High School | Graduated: May '20

Robotics and Leadership

Tennessee Technological University | Bachelor of Science (BS)

Manufacturing Engineering Technology (MET) | Graduation: Dec '26

Concentration in Mechatronics and a double minor in Business.

Work Experience

Project Engineering Intern

May '25 - Present

Bonnell Aluminum · Carthage, TN 37030, USA

- Designed and validated a 4,000-lb load-rated production rack using CAD and FEA, meeting strict stability and safety requirements while supporting paint department operations.
- Developed a high-capacity exhaust filtration concept utilizing a 15 HP, 16,000 CFM fan system to reduce hazardous particulate discharge while balancing energy efficiency and maintenance demands.
- Led cross-functional equipment and safety improvement initiatives by collaborating with operators, maintenance, and engineering to implement practical, floor-ready solutions.
- Conducted time studies and process evaluations to analyze workflow and recommend improvements.
- Created detailed drawings, documentation, and presentations to support project implementation.

Meat & Seafood

Aug '23 - Present

Clerk

Kroger · Cookeville, TN, USA

- Maintained compliance with food safety and sanitation standards through consistent quality checks.
- Managed product inventory, monitored freshness, and reduced waste by ensuring accurate stocking and labeling procedures.
- Optimized department workflow during high-traffic periods to improve efficiency and customer service response time.
- Provided clear product information to customers, supporting informed purchasing decisions.
-

Certifications

Precision Measurement and Calibration Certification (Starrett) | Starrett

- Certified in the use of precision measuring and calibration instruments, including Starrett tape measures, rulers, and dial calipers.

OSHA 10-Hour | OSHA

- Completed the OSHA 10 hour general certification course.
